

Students: Getting Started with Remind

What is Remind?

Remind is a communication tool that your teachers may use to communicate with you and your family. You can choose to get notifications through email, text, or through the app.

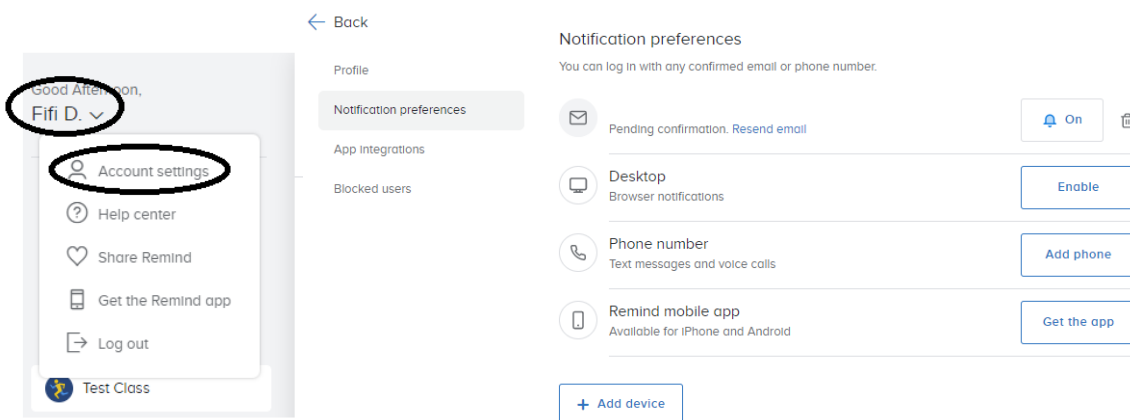

The school district has made an account for you using your school email address. If you have never used Remind before, please follow the New Remind User directions to get started. If you have used Remind before, please follow the Previous Remind User directions.

New Remind User

Go to https://www.remind.com/log_in and log in with Google

To get messages from Remind as texts or through the app:

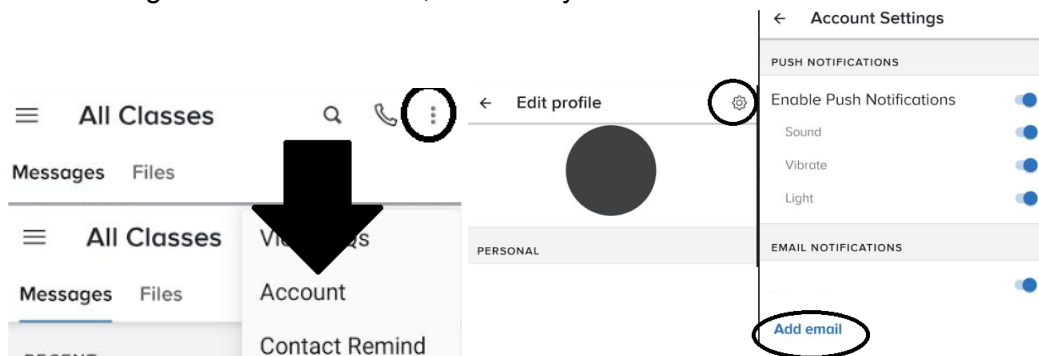

Click your name in the left corner and choose account settings, then notification preferences. Add phone number, app, or both.

If Remind does not allow you to add your phone number: [submit a ticket to Remind](#) asking them to link that phone number to your account

Previous Remind User

If you have used Remind through the app in the past, you will need to add your school email to your account in the app (if you have not already done so). In the app touch the 3 dots in the right corner, then select account. Touch the gear in the left corner, then add your school email.
